SUMMARY

Senior Software Engineer with 7+ years building backend systems, APIs, and cloud infrastructure using Node.js, TypeScript, and AWS. Shipped serverless SaaS backends, CMS microservices, WebAR products, and AI applications including company knowledge search (Lumus), AR commerce (AIRX), and YouTube RAG chat (Noema).

EXPERIENCE

Senior Software Engineer — Prezent AI

Remote | Dec 2024 – Present

- Built scalable serverless backends with Node.js and AWS Lambda for customer-facing products and internal admin tools.
- Collaborated with product, design, and QA in Agile sprints to gather requirements and deliver end-to-end features.
- Optimized PostgreSQL queries on large datasets, reducing API response times by up to 40%.
- Designed and integrated REST APIs powering front-end experiences and internal dashboards.
- Integrated Notion API into Auto Generator to automatically create presentations from Notion pages.
- Wrote unit tests for backend APIs to prevent regressions and support continuous integration.
- Implemented AWS CloudWatch monitoring and logging to improve observability and reduce production incidents.

Software Engineer — Ksolves India

Remote | Sep 2021 – Oct 2024

- Built CMS microservice APIs with Express.js, TypeScript, PostgreSQL, and AWS for reliable data handling at scale.
- Automated data migration with JavaScript scripts, reducing manual importing by 80%.
- Built localization tooling that enabled the product to enter 14 new geographic markets.
- Streamlined patch creation with automation scripts, cutting engineering time on patches by 20%.
- Onboarded 30+ customers across diverse environments with cross-functional teams.

Software Engineer — Immersion Software Labs Pvt Ltd

Bangalore, Karnataka | Jul 2019 – Sep 2021

- Designed REST APIs for CRUD operations with Node.js and Express.js.
- Created dynamic AR templates with JavaScript and A-Frame for immersive cross-device experiences.
- Secured APIs with JWT and SHA-256 authentication and authorization.
- Integrated Amazon Polly for personalized voice interactions in AR applications.
- Integrated Stripe payment gateway for secure web checkout flows.

Backend Engineer Intern — Immersion Software Labs Pvt Ltd

Bangalore, Karnataka | Jan 2019 – Apr 2019

- Built a web-based AR application with multi-device 3D model support using ARCore, 8th Wall, A-Frame, AR.js, and WebAR.
- Supported full-stack Node.js / Express.js applications delivering interactive AR experiences.

PROJECTS

Lumus — Company Intelligence | [cbos-web.vercel.app](#)

- Built an intelligence layer for companies to connect Slack, GitHub, Notion, and more, then search knowledge with citation-backed AI answers.
- Stack: Next.js, TypeScript, PostgreSQL, Clerk, Stripe, Supabase, Inngest (Turborepo monorepo).

AIRX — AR Commerce | [airx-beta.vercel.app](#)

- Shipped AI-powered AR commerce: product uploads, AR viewers, QR codes, lead capture, and product Q&A grounded in real specs.
- Stack: Next.js, TypeScript, Supabase, Model Viewer, Groq / Gemini, Vercel.

Noema — Chat with YouTube | [mvp-three-dun.vercel.app](#)

- Built a SaaS MVP to index YouTube transcripts and chat with channels using vector search and RAG answers with timestamps.
- Stack: Next.js, TypeScript, PostgreSQL, pgvector, OpenAI, Clerk, YouTube API.

EDUCATION

Bachelor of Technology in Information Technology — 75%

Kakatiya Institute of Technology and Science, Warangal, Telangana | 2015 – 2019

SKILLS

Languages & Frameworks: TypeScript, JavaScript, Node.js, Express.js, Next.js, Python

Data: PostgreSQL, MongoDB, Redis, SQL, Knex.js, pgvector, Supabase

Cloud & Tools: AWS (Lambda, S3, CloudWatch), Docker, Vercel, GitHub Actions, Jenkins, Postman, Swagger, Clerk, Stripe

Focus: REST APIs, Microservices, Serverless, RAG / AI apps, WebAR, Observability
