WORK EXPERIENCE

Prezent AI

Remote

Senior Software Engineer

Dec 2024 - Present

- Developed scalable serverless backend services using Node.js and AWS Lambda, supporting both customer-facing products and internal admin tools with high availability and low latency.
- Collaborated cross-functionally with product managers, designers, and QA in Agile sprints to gather requirements, prioritise tasks, and deliver end-to-end product features.
- Optimised complex SQL database queries (PostgreSQL) to improve backend performance, handling large-scale datasets and reducing API response times by up to 40%.
- Built and integrated RESTful APIs powering both front-end user experiences and internal dashboards, ensuring secure and efficient data communication.
- Integrated Notion API into SaaS products within the Auto Generator platform to automatically generate presentations from Notion pages, enhancing productivity and workflow automation.
- Wrote comprehensive unit test cases for backend APIs to ensure code quality, prevent regressions, and support continuous integration workflows.
- Conducted UI verification and functional testing to ensure consistent, reliable behaviour across internal tools and customer interfaces.
- Implemented monitoring and logging solutions using AWS CloudWatch to improve observability and reduce production incidents.

KSOLVES INDIA

Remote

Software Engineer

Sep 2021 - Oct 2024

- Developed back-end microservice APIs using Express.js (Node.js), TypeScript, PostgreSQL, and AWS infrastructure to support a custom content management system, significantly improving data handling and system reliability.
- Implemented data migration processes using JavaScript scripts, reducing manual importing by 80%, leading to faster data integration and reduced operational costs.
- Built localization support using JavaScript, enabling the product to enter 14 new geographic markets, which increased the potential user base and revenue streams.
- Designed and implemented streamlined patch creation processes using JavaScript scripts, reducing engineering time by 20% and allowing for quicker deployment of updates and features.
- Onboarded over 30+ customers into diverse environments through collaboration with cross-functional teams, improving customer satisfaction and product usability, and leading to higher customer retention rates.

IMMERSION SOFTWARE LABS PVT LTD

Bangalore, Karnataka

Software Engineer

Jul 2019 - Sep 2021

- Designed and developed REST APIs for CRUD operations using Node.js and Express.js, enabling efficient data management through POST, GET, PUT, and DELETE actions, and enhancing backend functionality.
- Created dynamic, responsive templates for augmented reality (AR) applications using JavaScript and A-Frame, ensuring immersive experiences across devices with 80% accuracy in rendering 3D models, images, and videos, significantly improving user experience.
- Implemented secure authentication and authorization mechanisms using JWT and SHA-256, ensuring secure access to REST APIs, protecting sensitive user data, and maintaining system integrity.
- Integrated AWS Amazon Polly into AR applications for dynamic, personalised voice interactions, delivering high-quality speech with 100% audio accuracy, enhancing user interaction and engagement.
- Integrated the Stripe payment gateway into web applications using the Stripe SDK, enabling secure and seamless payment processing, enhancing user experience, and facilitating smooth transactions.

Back-End Engineer Intern

Jan 2019 - Apr 2019

- Developed a web-based augmented reality (AR) application with extensive 3D model support across multiple devices, utilizing AR libraries such as ARCore, 8th Wall, A-Frame, AR.js, and WebAR. Enhanced user engagement and expanded the product's capabilities across various platforms.

- Engineered and supported full-stack applications using Node.js, Express.js, and AR libraries. Delivered seamless and interactive AR experiences, significantly improving user engagement and satisfaction.

EDUCATION

Kakatiya Institute Of Technology And Science

Warangal, Telangana

Bachelor of Technology in Information Technology

Graduation Date: May 2019

SKILLS & INTERESTS

Languages & Frameworks: JavaScript, ExpressJS, NodeJS, Typescript, Python

Database: PostgreSQL, MongoDB, SQL, KnexJS

Technologies & Developer Tools: GitHub, JIRA, Confluence, VS Code, GIT, AWS, S3, AWS Lambda, Redis, Figma, Swagger, Jenkins, Cursor AI, Postman, BitBucket, GitHub Actions, Docker, AI, Machine Learning, Neural Network, LLM, A-Frame, ARCore, WEB AR, ArJS, 8th Wall, Mind AR, ARToolKit.
